Summary

A passionate software developer with a strong foundation in modern web technologies and a commitment to solving real-world problems through innovative solutions. Enthusiastic about creating efficient, scalable applications and enhancing digital security. Skilled in HTML, CSS, JavaScript, and React.js, with experience in integrating payment gateways and user preference management. Driven to contribute to high-quality, user-centric products while continuously learning and embracing new challenges in software development.

Skills

Frontend Development:

- Proficient in crafting responsive and dynamic interfaces using **HTML**, **CSS**, **JavaScript**, and modern libraries like **React.js** and **Next.js**.
- Expert in **Bootstrap** and **Tailwind CSS** for creating pixel-perfect, user-focused designs.

State Management:

- Hands-on experience with **Redux** for building scalable and maintainable web applications.

Programming & Tooling:

- Strong command of **TypeScript** for building type-safe and robust applications.
- Skilled in version control systems, particularly **Git**, for efficient collaboration and code management.

UI/UX Enhancement:

- Adept at translating designs into clean, responsive code, ensuring cross-browser compatibility and optimized performance.

Modern Web Practices:

- Expertise in integrating modern frameworks and libraries to create seamless user experiences with a mobile-first approach.

Experience

Software Developer, Low Code Systems Software Pvt Ltd. – Pune   October 2023 – Current

Frontend Development:

- Spearheaded the development of feature-rich, high-performance web applications, managing both UI design and functional aspects using **React.js** and **Next.js**.
- Ensured seamless user experiences by optimizing application responsiveness, accessibility, and overall performance.

Leadership and Client Interaction:

- Successfully led a team of developers, providing technical mentorship and ensuring project milestones were met on time.
- Engaged directly with clients to gather and refine requirements, deliver impactful presentations, and conduct live product demos, driving customer satisfaction and project success.

Key Projects:

- **FairSeed (NGO):** Built and managed a platform for NGO activities, enhancing visibility and donor engagement.
- **CRM System:** Developed a robust customer relationship management tool to streamline business processes and client interactions.
- **DarulUloom Rashidia:** Created an innovative educational platform for managing academic and administrative tasks efficiently.

Education

Savitribai Phule Pune University,B.Sc (Computer Science)   July 2019 – April 2022
- CGPA: 8.25/10
- **Coursework:** Computer Architecture, Comparison of Learning Algorithms, Computational Theory

Savitribai Phule Pune University,M.Sc (Computer Science)   July 2022 – April 2024
- CGPA: 6.67/10
- **Coursework:** Advance OS , Advance Computational Theory

Projects

Fairseed   Fairseed.org
Summary of Work:
- **PhonePe Integration:** Integrated the **PhonePe** payment gateway for secure transactions in an e-commerce platform, enhancing user experience and ensuring smooth payment processing.
- **Pagination System:** Developed a custom pagination system to efficiently handle large datasets, improving performance and reducing page load times.
- **Custom Hooks for Form Handling:** Designed reusable custom hooks for managing form state and validation, optimizing form performance and reducing code redundancy.
- **Private Routing:** Implemented private routing in a React app to secure restricted routes and enable role-based access control for authenticated users.

Darululoom Rasheedia   darululoomrasheedia.org
Summary of Work:
- **Payment Gateway Integration:** Integrated **Razorpay** to enable seamless and secure payment transactions, significantly improving the user experience.
- **Contact Us Form Implementation:** Developed a robust contact form using **Formik** for form state management, **Yup** for validation, and **EmailJS** for email delivery, enhancing user communication with the application.
- **reCAPTCHA Integration:** Integrated **Google reCAPTCHA v2** into forms to bolster security against spam and automated bots, ensuring a seamless and secure user experience.
